

# INTRODUCING EicosaDerm

The first HI-POTENCY EPA (Omega-3) product available to the veterinary market.

Dogs & cats have strict dietary requirements for certain polyunsaturated fatty acids that are important for maintaining skin hair coat conditions and immune function.

Current research shows that Omega-3 fatty acids also play an important role in mediating and regulating responses within the body.

## EicosaDerm

### Features & Benefits

- Deodorized
  - Easy to use 8oz liquid pump
  - Trouble-free exact dosage
  - One pump per 20 pounds
  - 360 mg EPA (eicosapentaenoic acid)
  - 240 mg DHA (docasahexaenoic acid)
  - 10 IU – Vitamin E
  - No sugars or starch
  - Preservative free
  - Excellent value
- 180mg EPA/10 pounds/day

WHY?  
OMEGA-3

Omega-3 supplements have been used in veterinary trials with very favorable clinical responses.

Logas and Kunkle. "Double Blind Crossover study with hi-dose EPA for treatment of K9 pruritic skin disease" Vet Derm, 1994  
Logas, 2002 Proceedings AAVD, "omega 3 supplementation is used primarily for its antiinflammatory properties... pruritus, neoplastic disorders, autoimmune and other chronic debilitating diseases"

(Anti-inflammatory dosage used – 180mg EPA/10 pounds/day)
