

New Aqueous Formulation

TrizEDTA Aqueous

Highly effective Aqueous form of our already popular Crystal product now available to the veterinary market.

*Get Results...
increased antibiotic effect!*

Why?

Ears are the most common complaint from clients to veterinarians.

Current research shows TrizEDTA to be extremely effective against bacteria. Especially when used in conjunction with an antibiotic.

TrizEDTA is also very effective for preventing the recurrence of infection.

TrizEDTA is especially effective against pseudomonas.

*PATENTED
ONLY ALL USP FORMULA*

TrizEDTA Aqueous Features & Benefits

- All Natural
- NO Alcohol
- Non Ototoxic
- Excellent value
- Ideal 7.5 - 8.0 pH
- NO preservatives
- Increases antibiotic effect
- University Tested Formula
- Aqueous & Crystal Formula

TrizEDTA

Mechanism of Action

- ✓ TrizEDTA chelates the minerals in the cell wall of the bacteria. This allows channels to form making it easier for antibiotics to be delivered – faster and more efficient.
- ✓ Gram-negative antibiotics have been proven to have a synergistic effect when used with TrizEDTA.
- ✓ Also, TrizEDTA inactivates the antibiotic efflux pump inside the bacteria and inactivates catalase, the enzyme that causes ulceration.
